**Position Description:**

Tenure-track faculty position in the School of Industrial Design. The position in Industrial Designed is related to one or a combination of the following specialty areas, including: product development and innovation; interactive technologies; healthcare design and/or human-computer interaction. The faculty member should place a strong emphasis on human-centered design and user experience along with a strong track record and commitment to design, research, and teaching. The School of Industrial Design currently offers a Bachelor of Science in Industrial Design, Master of Industrial Design, Master of Science in Human-Computer Interaction (with a specialization in Industrial Design) a Minor in Industrial Design, and is working toward establishing a Ph.D. while currently offering a doctoral concentration in industrial design in connection with the School of Architecture. The School's mandate is to build design and research capabilities in collaboration with other well-recognized Programs and Centers on the campus including: Human-Computer Interaction, Mechanical Engineering, Biomedical Engineering, Architecture, Interactive Computing, Graphics Visualization and Usability Center, Center for Assistive Technology and Environmental Access, AMAC Accessibility, and SimTigrate Lab. The Faculty member will be expected to develop a strong collaborative research agenda ideally connected with one or more of the groups identified above; teach specialty courses in design theory or methodology; and/or teach an integrated design studio. A Ph.D. or advanced degree in industrial design is preferred. The candidate is expected to develop a strong collaborative agenda, place a strong emphasis on human-centered design and user experience and possess a strong track record and commitment to design, research and teaching.
